Note: There are currently no major coated paper capacity expansions occurring globally.
Global uncoated woodfree prices

HOW LARGE OF A GLOBAL PREMIUM CAN THE USA MAINTAIN?

- Brazilian prices can jump above US levels due to currency swings, premium versus offshore imports.
- US and European prices have historically been close, but wide gap has re-opened due to tighter US market.
- Asian gap with US prices at all-time peak of more than $300/tonne in early 2019.
Signs that printing & writing profitability has peaked

MARKETS HAVE ALREADY STARTED TO WEAKEN
- Weak demand, more capacity startups and falling costs for fiber in Asia
- US producers forced to roll back some of 2019 UWF price hike despite G-P closure

AFTER SPIKING, MILL COST INFLATION IS ABATING
- Pulp prices in decline
- Energy down sharply, albeit starting to recover

RISE IN IMPORTS
- Global oversupply will increase competition
- Stronger US dollar and some tariff reductions

REDUCED CONVERSION OPPORTUNITY
- Less room for new containerboard machines, global economic risks

---

2-5%
Mexican USD P&W prices down 2-5% y-o-y in 3Q19

5-15%
Brazilian P&W prices down 5-15% in first half of 2019
Next moves for US printing & writing prices will be down

US PRICES 5-12% ABOVE YEAR-AGO LEVELS IN EARLY 2019

- No room for any further gains even with major capacity closures.
- Prices for most grades have already begun to erode.
- Any potential recession likely to trigger larger demand declines and result in price drops.
North American containerboard producers are taking economic downtime to address slower demand growth
Robust capacity expansion will keep North American containerboard operating rates depressed

[Graph showing changes in demand, capacity, true demand, and operating rates from 2011 to 2021.]
Slow growth in North American boxboard demand and supply

[Diagram showing changes in demand, capacity, and operating rates over the years 2011 to 2021.]
Snapshot of 2018 Asian containerboard demand and supply

**Chinese demand fell an estimated 3% in 2018**
- Deceleration in economic growth
- Some substitution from paper to plastics
- E-commerce working to reduce its packaging footprint
- Significant uncertainty in the level of decline

**Rest of Asia saw fairly steady growth at 3.8% in 2018**
- Compared to average of 4.0% per year in 2016-2017

**Chinese output tumbled while net imports soared**
- Chinese production fell an estimated 5% or 2.5 million tonnes
- Net imports jumped almost 1.1 million tonnes
- Rest of Asia supplied much of this, with net imports climbing 800,000 tonnes

**Entering 2019, demand conditions have been sluggish**
- Economic weakness and effects of lingering US-China trade war
Chinese RCP policies are changing the way companies are operating

Constrained fiber supplies driving up imports and reducing production
- RCP imports fell from 25.7 million tonnes in 2017 to 17.0 million tonnes in 2018.
- Expected to fall to 10-12 million tonnes in 2019 and then 5-6 million tonnes in 2020 before total ban goes into effect in 2021.

Large companies are making investments in light of the new policies
- Numerous projects in the works in Vietnam, Malaysia, Laos and India

Previously planned projects apparently being delayed
- Due to economic weakness and effects of lingering US-China trade war
The smaller exporters to the world reaped most of the benefits from the shift in Chinese policy (net exports to world)
China’s containerboard market adjusting to new RCP policies

Year-to-year change

**DEMAND WILL DROP AGAIN IN 2019 AND THEN MOVE UP IN 2020**

- Weak economy
- Dictated by fiber balance

**PRODUCTION WILL FALL AND NET IMPORTS WILL CLIMB**

- Output constrained by fiber
- Market attractive to other Asian suppliers
- But can imports continue to climb that much?

**OPERATING RATES ARE TUMBLING**

- Level dependent on capacity assumptions

---

2019 | Fastmarkets | Global Containerboard and Boxboard Outlook
The North American tissue market has been strong recently

- The AfH sector in particular benefitted from the strong economy, low gasoline prices and changing lifestyle of younger generations.
US tissue import growth, 2009-2018

- Canada continues to be the main US import source for tissue, but China has taken second place ahead of Mexico and Indonesia.
- However, imports tariffs will restrict imports from China; the first five months of 2019 show decreases in the volume of Chinese tissue imported by the USA.

Average growth rate, 2009-2018: 5.4% per year
Expected growth in US tissue consumption by business sector

- At-Home retailer labels will show the strongest growth, while At-Home branded volume growth will remain moderate.
- AfH growth will rise above average At-Home growth.
Major tissue capacity changes in North America, 2018-2021

2018

• Georgia-Pacific, Augusta, GA, USA -31,000 t/a
• Sofidel America, Circleville, OH, USA (2 x NTT) 140,000 t/a
• Kimberly-Clark, Fullerton, CA, USA -60,000 t/a
• First Quality Tissue, Anderson, SC, USA (TAD PM) 64,000 t/a

2019

• Soundview Paper, Elmwood Park, NJ, USA (closure after two fires) -110,000 t/a
• Clearwater Paper, Shelby, NC, USA (NTT PM) 64,000 t/a
• Irving Consumer Products, Macon, GA, USA (TAD PM) 64,000 t/a
• Cascades Tissue Group, Scarborough and Whitby, ON, Canada (mill closures) -61,000 t/a
• Soundview Paper, Elmwood Park, NJ, USA (restart of PM11) 60,000 t/a
• Georgia-Pacific Corp., Crossett, AR, USA (closure of the oldest PM) -30,000 t/a
• Georgia-Pacific Corp., Palatka, FL, USA (TAD PM) 72,000 t/a
• Sofidel America, Inola, OK, USA 60,000 t/a

2020-2021

• First Quality Tissue, Lock Haven, PA, USA 64,000 t/a
• Sofidel America, Inola, OK, USA 60,000 t/a
• Georgia-Pacific, Naheola, AL, USA (replacement) 8,000 t/a

• Sofidel America, Inola, OK, USA 60,000 t/a
• Georgia-Pacific, Naheola, AL, USA (replacement) 8,000 t/a
• Kruger Tissue, Brompton, Sherbrooke, QC, Canada (TAD PM) 70,000 t/a
Net capacity change* and tissue operating rate in North America

- The outlook is surprisingly good despite the number of projects, but a lot depends on how much tariffs on imports from China change the net trade balance.
- We assume a conservative decline in net imports in this forecast (trend change).

* Based on committed projects only.
Pulp markets recently completed an historical run…
Producer inventories reach a record high

LATIN AMERICAN PRODUCERS DOMINATE THE LOW END OF THE COST CURVE

- Latin American producers benefit from low-cost wood and the exchange rate
- Higher-cost facilities tend to be much smaller and located in Asia and the Northern Hemisphere
Limited market pulp capacity expansion until 2021
Pulp market could remain weaker for longer
China and Other Asia: RCP imports

Million tonnes

OTHER ASIA CATCHING UP WITH CHINA

2012 2014 2016 2017 2018

2019 | Fastmarkets | Outlook for Global RCP Markets
OCC prices in different regions

CHINESE PAPER COMPANIES FACING HIGH RECYCLED FIBER COSTS

- Before July 2017, one set of OCC prices
- Now, two sets of prices: Chinese price and prices outside of China
- Sharp drop in US and European OCC prices
- Low OCC import prices in Southeast Asia
- Domestically collected OCC became quite expensive in China due to the overall recycled fiber shortage issue in 2018
- Recent decline in OCC prices globally because of the weak paper packaging markets and reduction in Asian RCP purchases
China’s investments in recycled pulp

ANNOUNCED AND ESTIMATED RECYCLED PULP PROJECTS

• Nine Dragons
  • Fairmont, USA: About 220,000 tonnes per year (started up already)
  • Biron, USA: 650,000 tonnes per year
