SUPPORT FOR LD 1423 COMPROMISE AMENDMENT

Please indicate your position on the *updated* amendment for LD 1423 "And Act to Improve Recycling by Updating the Stewardship Program for Packaging. This amendment makes targeted changes to definitions that will be important for Maine manufacturers, and others, without delaying or substantially changing the scope of the program. By signing this form you acknowledge that you have reviewed the document titled "LD 1423 Compromise Amendment for Work Session".

The amendment has been crafted to achieve the following objectives:

- **Defines "consumer"** to exclude packaging used in business-to-business transport or during manufacturing—so long as it is managed and paid for exclusively by the producer or manufacturer.
- **Clarifies "post-consumer recycled content"** to include pre-consumer "broke" materials and exempts packaging from penalties if PCR use is restricted by federal or state regulations (e.g., food-contact packaging).
- **Incorporates the definition of "producer"** from LD 1423 to improve clarity and ensure alignment with other state EPR for Packaging programs.
- **Refines "toxicity" definition** by adding "intentional addition" language without triggering broader regulatory consequences.
- **Removes the UPC code submission requirement** for producers, recognizing it as administratively burdensome and unlikely to enhance enforcement outcomes.
